³Top GOP candidate donor companies in the S&P 500 Index as ranked by the Point Bridge America First Index Methodology

» Fund Description

» The Point Bridge America First ETF (MAGA) seeks to track the performance of the Point Bridge America First Index ("MAGA Index"), an equal-weight custom index derived from holdings in the S&P 500 Index.

- Using a rules-based methodology, the Index selects the top 150 Republican/ GOP stocks from the S&P 500 based on the political contributions of the company PACs and employees during the previous two election cycles, and subsequently measures the percentage of domestic assets versus foreign assets of the companies.
- MAGA is the first ETF of its kind, providing investors with the opportunity to make investment decisions based on their Republican political beliefs

» Advisor

» Point Bridge Capital, LLC, an SEC-registered investment advisor based in Fort Worth, Texas, serves as the fund advisor for the ETF. Point Bridge Capital was established in 2013 by Hal Lambert. Point Bridge Capital manages assets for ultra-high net worth clients. Point Bridge created **Politically Responsible Investing**[®] and Political Beta[®] as a new factor-based investment approach.

ETF Risks

Investing involves risk, including possible loss of principal. Mid-capitalization companies may be more vulnerable to adverse business or economic events than larger, more established companies. The Fund is non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance. Index composition is heavily dependent on quantitative models and data supplied by third parties. Where such models and data are incorrect or incomplete, the composition of the Index will reflect such errors and likewise the Fund's portfolio. Because the methodology of the Index selects securities of issuers for non-financial reasons, the Fund may underperform the broader equity market or other funds that do not utilize similar criteria when selecting investments. The Fund is not actively managed and therefore would not sell shares of an equity security unless that security is removed from the Index or the selling of shares is otherwise required upon a rebalancing of the Index. Real Estate investments are subject to changes in economic conditions, credit risk, and interest rate fluctuations.
